

Financial Analysis – Municipal Focus Webinar

April 7, 2021
10:00 AM – 11:30 AM MST
Presented By Tim Duhamel

Learn how financial analysis plays a key component in financial sustainability.
The following will be covered in this course:

Learn how financial analysis plays a key component in financial sustainability.

Municipalities are faced with significant financial challenges in the coming years. Having the ability to analyze challenges accurately is an important competency required to ensure long-term financial sustainability.

Financial analytics defined and use.

- ✓ Financial analytics is the science of bringing together data in a meaningful and logical way that supports decision making.
- ✓ Collecting, monitoring, analyzing, storing, and predicting data are all part of financial analytics.
- ✓ Financial analytics is a critical component in evidence-based decision making and supports priority setting.

Learn how to foster better decisions using “what if” analysis for evidence-based decision making.

- ✓ Actuals analysis – learn how to use history to predict the future for budget purposes.
- ✓ Municipal Price Inflation (MPI) – learn how to calculate the cost of inflation for your municipality and link it to a tax strategy.
- ✓ Analyzing the cost of growth – learn the fundamentals of analyzing the cost of municipal growth.
- ✓ Municipal tax strategy – learn how to calculate short- and long-term tax requirements that make up a long-term tax strategy.

Bloom Course Testimonials

“Exceptionally good in every aspect. Thank you very much Tim for assembling and delivering such a wonderful webinar.”
